

Post-Sandy Waterfront Recovery

Founded 1960 | ISO 9001:2008 Certified | Full Service Firm | Employee-Owned

OUR MISSION:

“We will strive to be our clients’ first choice through planning, engineering and management excellence”

Let Urban Engineers assist you in your Hurricane Sandy recovery efforts. Urban is one of the premier waterfront design engineering firms in the mid- Atlantic region. A full service engineering firm founded in 1960, Urban counts itself among the handful of firms in the United States with a dedicated Ports & Waterways Division. Urban is known and trusted for providing quality maritime facility inspections to a diverse array of public and private sector clients.

Our waterfront engineering capabilities include:

- Condition Inspections, including **Topside and Underwater Inspection** and **Hydrographic Surveys**
- **Repair Design and Cost Estimating** for rehabilitating existing waterfront structures
- **Construction Management**
- **Permit Acquisition**

Urban’s staff includes a former Association of Diving Contractors (ADC)-certified diver, who is also a registered professional engineer. The underwater inspection will be performed by an **OSHA-compliant dive team** consisting of experienced professional divers and engineers. Urban’s team can **quickly mobilize** to your site and provide a condition survey and recommendations for repair or replacement of your waterfront facilities in a report that includes concise evaluations and recommendations.

Our Ports & Waterways team is backed by a 450+ employee, full-service engineering company with expertise in: **Site/Land Development; Mechanical, Electrical, Plumbing, and Fire Protection; Structural; Airports; Transit, Freight and Passenger Rail; Bridge Services; Highways and Streets; and Environmental Services.**
